
Astronics tapped by large U.S. carrier

By **PAX International** on April, 22 2019 | Inflight Entertainment

[Astronics Corporation](#) will supply inflight entertainment system hardware for a next-generation inflight entertainment and connectivity (IFEC) system being developed by a major U.S. carrier. Under the agreement, Astronics' products will equip nearly 50 of the airlines' new wide-body aircraft.

Provided by Astronics CSC, a wholly owned subsidiary of Astronics Corporation, Astronics is now delivering production units that are a combination of new and existing products, both standard off-the-shelf and custom designs.
