

# RoyalJet takes in-seat stowage package from HAECO

The all-in-one cargo solution from HAECO Cabin Solutions

Abu Dhabi-based luxury charter carrier [RoyalJet](#) has incorporated [HAECO Cabin Solutions'](#) in-seat package stowage systems, allowing cargo to be carried in the passenger cabin of its 737-700.

"In our drive to enhance the capabilities of our fleet during these challenging times we have been searching for ways to allow our customers to transport more precious cargo on their trips. Of the solutions we considered, HAECO Cabin Solutions' all-in-one cargo solution and cargo bags provided the most payload and cargo volume and was easily configurable to adapt to the available space, maximizing cargo capacity while minimizing cabin modification," said Rob DiCatri, Chief Executive Officer of RoyalJet.

HAECO Cabin Solutions provided the Supplemental Type Certificate (STC) for the equipment and installation, and the United Arab Emirates' General Civil Aviation Authority (GCAA) granted operational approval to operate the aircraft with both cargo and passengers, greatly enhancing RoyalJet's operational flexibility.

"These are challenging times for airlines. We are delighted to offer these quick and cost-effective solutions that allow RoyalJet to continue passenger operations as well as the capability to greatly increase and maximize the cargo volume and payload capacity of their aircraft," said Doug Rasmussen, President and Group Director of HAECO Cabin Solutions.
