
Kuwait Airways takes seating and galley inserts from Collins

By **Rick Lundstrom** on July, 12 2019 | Trolleys & Galleys

Kuwait Airways' A330-800neo Business Class will have the Super Diamond business class seats, and the recently introduced Essence™ galley inserts from [Collins Aerospace Systems](#).

Eight A330-800neo aircraft will enter into service in 2020.

“Accommodating passengers in today’s competitive airspace means offering highly distinctive experiences through the seat they sit in, the quality of food and beverage service along with other amenities offered throughout a flight,” said Alastair Hamilton, vice president, Sales and Marketing, Interiors for Collins Aerospace, in today’s announcement. “Super Diamond and our Essence Galley Inserts are proven to exceed expectations and make the passenger’s journey as enjoyable as possible.”

The Essence galley inserts from Collins Aerospace

Kuwait Airways joins more than 20 airlines in selecting the Super Diamond business class seat. The airline will install 32 individual passenger placements, per aircraft in a 1-2-1 configuration. This brings the total to 10,000 Super Diamond seats flying worldwide.

Passengers will experience all-aisle access, a 78-inch fully-flat Business Class solution teamed with the [Crystalflex™](#) diaphragm comfort system from Milliken Textiles, living space with increased stowage, and gate-to-gate in-flight entertainment solutions all while maintaining overall cabin space.

Also on board Kuwait Airways' A330 fleet will be Collins Aerospace's full suite of Essence™ galley inserts that include steam ovens and espresso machines plus a full suite of galley-chilling equipment.
