

Motorized drive solutions from Faulhaber

By **Rick Lundstrom** on November, 1 2017 | Cabin Equipment

[Faulhaber Group](#) has developed a line of motorized drive solutions for the aircraft cabin. The small motors can be used to operate window blinds, seat adjustments, moving toilet seats and other tasks in the aircraft cabin. The company uses high-quality gearheads and lightweight construction. Faulhaber has been supplying drives for adjusting First Class seating for more than 15 years. It also supplies a window adjustment engine for the A319 as well as mechanism for locking cabin doors, emergency exits and pilots seats and other cabin functions.
