
Next Generation SmartTray

By **Rick Lundstrom** on December, 23 2014 | Cabin Equipment

SmartTray International, LLC of Phoenix announced today their Next Gen expandable groove technology engineered to hold smartphones and tablets with and without protective device cases. The groove expands and retracts automatically to the thickness of the passenger's device. SmartTray's patented groove technology is simple, intuitive, practical, robust, and easy to use, install and maintain. SmartTray has retrofit options with licensed partners and is working with major seat OEMs on line fit solutions.
