
Serving solution from IN Air Travel Experience

By **PAX International** on September, 4 2019 | Food & Beverage

The IN.bowl will be shown to visitors at this years APEX/IFSA/AIX Expo on Los Angeles

Following the recent launch of is susta.IN program, [IN Air Travel Experience](#) is accelerating the development of sustainable initiatives designed to boost passenger satisfaction and generate smart savings.

“An obvious first step towards a more environmentally friendly inflight experience is reducing cabin waste by simplifying the onboard service,” said a release from the company. “Removing excess items like the meal tray and disposable plastics, whilst improving the quality of the food. Provide less but experience more. “

The IN.bowl, is designed to take away unnecessary elements and put the value in the food served as well as reduce costs, catering complexity, handling and achieve up to 55%-100% reduction in single-use plastics.

Additionally, the IN.bowl generates space and weight savings, is easy and fast to serve and efficient to clear for the crew.
