

Axinom reshapes IFE delivery with next-gen solution

This is a special feature from the [April 2026 AIX Hamburg issue](#) of *PAX Tech* [page 8](#).

Axinom Stream is designed to adapt to any fleet and infrastructure, transforming how entertainment and digital services are delivered to passengers

[Axinom's](#) next-generation IFE solution, Axinom Stream will be introduced at [AIX](#) 2026.

Axinom Stream is designed to adapt to any fleet and infrastructure, transforming how entertainment and digital services are delivered to passengers. It unifies Axinom's proven IFEC solutions into a single, modular platform with two deployment options that support airlines at any stage of connectivity readiness: Cloud Streaming and On-Board Streaming.

"Launching a new product is exciting – seeing it resonate with the industry is incredibly rewarding," Ralph Wagner, CEO of Axinom. Tell *Pax Tech*. "Axinom Stream marks a fundamental shift away from rigid IFE architectures toward adaptive, future-ready delivery models."

Axinom will exhibit at booth 3C55 at AIX 2026.
