

FTS Technologies wins Spring Airlines A320 cabin Wi-Fi project

This is a special feature from the November 2025 [APEX FTE Asia Expo issue](#) of *PAX Tech*, on [page 7](#).

Under the agreement, FTS will deliver developed cabin Wi-Fi hardware and retrofit solutions to Spring Airlines

[FTS Technologies](#), a subsidiary of China Aviation Supplies Holding Company (CASC) and supplier of avionics systems and a digital technologies provider for the civil aviation industry, has won the bid for [Spring Airlines'](#) A320 fleet cabin Wi-Fi project.

Under the agreement, FTS will deliver developed cabin Wi-Fi hardware and retrofit solutions to support Spring Airlines in advancing its passenger services and expanding its inflight e-commerce operations. The project marks a significant step in the airline's ongoing digital transformation and service upgrade initiatives.
