

Linstol expands audio portfolio with Sound by Bose

Linstol expands audio portfolio with Sound by Bose headphones for inflight

[Linstol](#) has announced the latest addition to its growing audio portfolio: Sound by Bose, bringing one of the world's most recognized audio brands into the inflight environment.

Renowned for its industry-leading acoustic performance, innovation, and engineering excellence, Bose has long set the benchmark for premium sound experiences. The introduction of Sound by Bose further strengthens Linstol's commitment to delivering high-quality inflight entertainment solutions that elevate passenger comfort and satisfaction.

According to Linstol, As airlines continue to prioritize differentiated onboard experiences, audio quality remains a critical touchpoint. By integrating Sound by Bose into its portfolio, Linstol offers airline partners access to globally trusted sound performance combined with operational expertise, customization capabilities and supply chain reliability.

The addition complements Linstol's existing range of earbuds, headsets and headbands expanding options across cabin classes while maintaining a focus on innovation, sustainability and cost-efficiency.

"Audio plays a vital role in shaping the passenger journey," said Jakob Levison Global Director of Audio at Linstol. "Introducing Sound by Bose to our portfolio allows us to combine world-class acoustic engineering with our deep understanding of airline operational needs. It is about delivering premium sound seamlessly and at scale."

Sound by Bose will be showcased at [WTCE 2026](#), where visitors can experience firsthand how elevated audio enhances the overall inflight experience.
