

Linstol highlights curated audio portfolio to elevate passenger experience

Linstol's audio portfolio includes Meridian, Sound by Bose Technology, and Bang & Olufsen

[Linstol](#) is highlighting its audio portfolio for the airline sector, bringing together a curated mix of globally recognized brands and tailored inflight solutions designed to meet the needs of every cabin.

Linstol's audio portfolio brings together a comprehensive range of globally recognized brands, some of which include Meridian, Sound by Bose Technology, and Bang & Olufsen. The portfolio is further complemented alongside Linstol's in-house audio collection, developed specifically for the inflight environment to deliver comfort, consistency, and scalable solutions.

"Our approach is about offering airlines true flexibility through a carefully curated portfolio. Bringing together globally respected audio brands alongside our own in-house solutions, all tailored to elevate the onboard experience across every cabin," said Jakob Levison Global Director of Audio.

Together, this portfolio bridges the gap between retail-inspired design and aviation performance, ensuring each headset is optimized for comfort, reliability and seamless onboard integration.

More than hardware, Linstol positions audio as a sensory layer of the journey, the company said in an April 17 statement.
