
SAUDIA offers limited free Wi-Fi to loyalty group

By **Rick Lundstrom** on January, 3 2019 | Connectivity & Satellites

Silver and Gold tier members of the Al Fursan loyalty program on Saudi Arabian Airlines can now access up to 100 megabytes of free Wi-Fi onboard any Internet-enabled SAUDIA aircraft on domestic and international destinations.

Passengers can access the plan by inserting their ticket number on the Wi-Fi login page and begin surfing the web after a short sign-in process. The airline announced the new feature at the end of December

To date, 104 aircraft in SAUDIA's fleet are enabled with Wi-Fi and GSM capabilities. The inflight entertainment system has more than 4,000 hours of Hollywood premiere and latest television shows, box sets, music, multi-language, international and children's programming, as well as digital and audio books.

In 2018 SAUDIA introduced five new routes to its network: Vienna, Austria; Trivandrum, India; Surabaya, Indonesia; Medan, Indonesia; and re-introduced flights to Cochin, India.
