

# AirX integrates Moment's W-IFE Flyingingo Box

“In just a short time we are able to offer our customers a premium digital service like-at-home,” said Houssam Hazzoury, CEO of AirX Group

[AirX](#) announced the integration of [Moment's](#) Flyingingo Box solution aboard its VIP A340 aircraft. The portable plug-and-play W-IFE system enables AirX passengers to access premium services and entertainment content, including films, tv shows, magazines and music while flying.

“We were convinced by the flexibility and ease of installation of Moment's solution,” said Houssam Hazzoury, CEO of AirX Group. “In just a short time we are able to offer our customers a premium digital service like-at-home.”

Once set up in the cabin, the Box supports advanced streaming for passengers looking for “always-on connectivity”, the release said. “With a few clicks and from their own electronic devices, they access a personalized digital portal providing optimal services.”

Dieudonné Kamaté, Business Development Director at Moment, was pleased to partner with AirX. “This agreement highlights our capacity to adapt to all types of aircraft and business models and confirms our ambition to be a trusted partner serving more airline companies,” Kamaté said.

AirX is based in Malta and the UK. It operates with 17 aircraft and is one of the largest fleets in European private aviation.
