

Chair Airlines selects Inflight Dublin's Everhub™ wireless IFE solution

Inflight Dublin's Everhub selected by Chair Airlines

[Inflight Dublin](#) has announced that it has been awarded the contract to supply its [Everhub™](#) wireless IFE solution across [Chair Airlines'](#) fleet.

Inflight Dublin was selected after a successful trial and market analysis by Chair Airlines, the September 12 press release said. Everhub™ allows the airline to build an ecosystem of services that passengers can access directly through their personal devices. This ensures a personalized experience, tailored to the needs and preferences of each passenger.

Chair Airlines will be deploying the aircraft powered configuration of Everhub, which includes integration with a number of discrete signals from the aircraft to enable more automation and minimize crew interaction.

"We are thrilled to collaborate with Chair Airlines and bring our Everhub™ solution to its fleet. This partnership underscores our commitment to delivering cutting-edge inflight entertainment solutions that elevates the passenger experience and journey. We look forward to working closely with Chair Airlines to provide their passengers with an unparalleled inflight experience and help evolve their IFE offering over the coming years," said Shane Healy, Senior Program Manager of Inflight Dublin.

By implementing the Everhub™ wireless IFE solution, Chair Airlines aims to further elevate its inflight offering, providing passengers with high-quality entertainment options and an enhanced travel experience.

"At Chair Airlines, we are dedicated to improving the travel experience for our passengers. Partnering with Inflight Dublin to introduce the Everhub™ wireless IFE solution is a testament to our commitment

to excellence. We are excited to offer our passengers this enhanced entertainment option, ensuring a more enjoyable and memorable journey,” said Dave Parkyn, Senior Director Customer Experience of Chair Airlines.

The rollout of the Everhub™ wireless IFE solution on Chair Airlines’ fleet commenced in May with a projected plan to have the aircraft powered servers installed by October. Inflight Dublin will provide comprehensive support and training throughout the installation to ensure optimal performance of the new system.
