

Condor taps Inflight Dublin for IFE

Passengers will be able to access the web-based app by scanning a QR code on the back of their seat

[Inflight Dublin](#) has been chosen by [Condor](#) to provide a full rollout of its Wireless Inflight Entertainment (IFE) solution, [Everhub](#), on its narrow-body fleet.

Starting in April, Inflight Dublin will expand their wireless IFE solution to cover 35 aircraft including A321, A320 and B757 aircraft.

Inflight Dublin's proven platform is now even more user-friendly as passengers will be able to easily access the web-based app by scanning a QR code on the back of their seat," said a [February 24 press release](#). "The content package includes the latest Hollywood movies, TV Box Sets, bespoke Audio Playlists, Life & Culture documentaries and local German content as well as Gladi8tor games."

"In the 10 plus years we have worked with Inflight Dublin, our IFE product and service offering has continuously evolved and improved through enhancements and innovations on board. We are pleased to be carrying out an expansion of the Everhub solution across our narrow-body fleet after achieving such positive results and feedback from our passengers," said Janina Kratz, Condor Product Manager, IFE.

This latest rollout is part of a broader strategy between Inflight Dublin, Condor, and other key stakeholders to create a seamless passenger experience and expand their retail and revenue generation capabilities.

"We are excited to take our service offering to new heights with Condor, a truly passenger-centric airline whom we have thoroughly enjoyed working with over the years. Our goal for the full rollout of Everhub is to not only surprise and delight passengers with tailored content and engaging services, but also to enable a digital retail experience that will enhance the passenger experience and deliver ancillary revenues for Condor," said Barry Flynn, Inflight Dublin's CCO.
