

Copa Airlines selects Inflight Dublin's Everhub W-IFE for 737 fleet

Copa Airlines 737-800A

[Inflight Dublin](#) announced today at APEX Global EXPO that it has been awarded the contract to supply its Everhub™ wireless IFE solution across [Copa Airlines'](#) 737 fleet. This partnership marks a major milestone in enhancing the passenger experience on Copa Airlines.

Inflight Dublin was selected after a considerable testing process and market analysis by Copa Airlines, which it says is a testament to Everhub's™ capabilities. Everhub™ allows the airline to build an ecosystem of services that passengers can access directly through their personal devices. This ensures a personalized and convenient experience, tailored to the needs and preferences of each passenger.

Copa Airlines will also be deploying the aircraft powered configuration of Everhub, which includes integration with a number of discrete signals from the aircraft to enable more automation and minimize crew interaction. An example is automatic playback pause for passenger announcements, fasten seat belt messages and establishing connectivity when on the ground, Inflight Dublin said in its press release.

Speaking about the new partnership, Philip McCarthy, Commercial Director of Inflight Dublin, said, "We are thrilled to collaborate with Copa Airlines and bring our Everhub™ solution to its 737 fleet. This partnership underlines our commitment to delivering cutting-edge in-flight entertainment solutions that enhance the passenger experience. We look forward to working closely with Copa Airlines to provide their passengers with an unparalleled inflight experience."

By implementing the Everhub™ wireless IFE solution, Copa Airlines aims to further elevate its inflight offering, providing passengers with high-quality entertainment options and a more enjoyable travel experience.

Diana Mizrahi, Senior Director Customer Experience of Copa Airlines, commented, "At Copa Airlines, we are dedicated to improving the travel experience for our passengers. Partnering with Inflight Dublin to introduce the Everhub™ wireless IFE solution is a testament to our commitment to excellence. We are excited to offer our passengers this enhanced entertainment option, ensuring a more enjoyable and memorable journey."

The rollout of the Everhub™ wireless IFE solution on Copa Airlines' 737 fleet commenced in July with installation across a further 60 aircraft scheduled for completion by the end of 2025. Inflight Dublin will provide comprehensive support and training throughout the installation to ensure optimal performance of the new system.
