

Inflight Dublin adds FlightPath3D to suite of partner apps

FlightPath3D map display

[Inflight Dublin](#) announced this month that it has added [FlightPath3D](#)'s interactive moving map to its suite of Partner apps on the Everhub wireless platform. The company said in its press release that the product option will be available to clients.

"We are delighted to be working with FlightPath3D to provide their map as an option for Everhub as well as our existing map. This partnership and integration advances our goal to grow Everhub as a delivery platform to complement our software with best-of-breed partner products, delivering exciting new content and services as part of a one-stop shop to our clients and prospects," said David Miller, Inflight Dublin's CTO.

Duncan Jackson, President of FlightPath3D, also commented on the news, "This integration with Inflight Dublin extends the offering from seatback IFE systems to the rapidly growing market for wireless IFE platforms. We look forward to growing our partnership with the ultimate goal of giving digital travellers an immersive, flexible experience."

The integrated product is already being offered to joint clients of both companies, such as airlines using Inflight Dublin's Everhub wireless platform for their fleet. The first confirmed mutual client is Sunclass Airlines.
