

Inflight Dublin selected by Novair for IFE

Inflight Dublin to equip Novair's fleet of A321 aircraft with a six-month trial of its Everhub Wireless solution

[Inflight Dublin](#) announced it has been chosen by [Novair](#) to provide it with its Inflight Entertainment (IFE) solution, [Everhub](#).

A [March 15 press release](#) said Inflight Dublin will initially be equipping Novair's fleet of A321 aircraft with a six-month trial of its Everhub Wireless solution including hardware, software and content.

The user-friendly GUI allows passengers to easily navigate the system and browse the latest Hollywood blockbusters, TV shows, international content, documentaries, games and digitized publications available on board.

"Novair places a big focus on choosing products and services that align with our brand values and sustainability goals. Utilizing Inflight Dublin's Everhub solution allows us to create a unique and enhanced passenger experience that also minimizes weight and fuel costs, particularly due to the ability to make all paper materials digital on the system," said Paul de Susini, Head of Onboard product and catering at Novair.

Novair said it is looking forward to working with Inflight Dublin to deliver this innovative solution.

We are delighted to be working with Novair on this project and we look forward to engage and delight its passengers on board," said Barry Flynn, Inflight Dublin's CCO.
