

Lufthansa Group selects FlightPath3D for fleet-wide installations

FlightPath3D's map solution was selected by Lufthansa Group to be installed across its long-haul fleet.

[Lufthansa Group](#) has chosen [FlightPath3D](#)'s map to be installed across its long-haul fleet. The first launch will be installed on the Groups' A350, 787, 747-800, and A330 aircraft.

"We're privileged to be adding the Lufthansa Group to our growing list of customers and helping them to deliver an outstanding passenger experience across their multi-OEM IFE fleet," said FlightPath3D President Duncan Jackson in a May 2 press release.

Lufthansa Group IFEC Product Manager Susanne Wawer said the Group is looking forward to installing FlightPath3D on the fleet later this year.

"The map product is intensely used amongst our passengers on board. Enhancing their experience by offering an innovative, interactive 3D flight map adds value to our passenger journey," added Wawer.

FlightPath3D CEO Boris Veksler said the company's solution is available on any IFE architecture and any OEM Ice platform.

"We're proud of the integration, certification, and joint sales efforts with all of the industry's major OEM partners," said Veksler.
