

# Moment launches private aviation IFE offer with Flymingo Jet

With the goal of increasing passenger loyalty and driving engagement, [Moment](#) announced the launch of its private aviation IFE offering with Flymingo Jet.

Flymingo Jet, an advanced entertainment and services platform for executive air travel, is “a passenger-centric system that delivers services adapted both to the specifics of the cabin and to the premium nature of the journey.” The digital portal and its interface are fully customisable to operators’ requirements and the modular services meet the needs of ultra-connected passengers accustomed to operational excellence and premium offerings, the release said.

“We are delighted to expand our activities to the strategic market of private aviation and to bring new capabilities to the private flight experience,” said Tanguy Morel, Moment’s CEO & Co-founder. “Flymingo Jet is designed to enhance aircraft cabins by bringing a new level of comfort to executive passengers.”

VIP passengers will be able to select from a wide selection of magazines, recent and classic films in several languages and Flymingo Jet also allows for the possibility of digitizing all onboard services, such as catering. Content can be easily by upgraded via 4G, Wi-Fi connection or by a secured USB key. Passengers can access the dedicated portal from their own electronic devices or tablets made available by flight operators.

According to the release, Flymingo Jet is compatible with all types of jets and has already been deployed onboard several aircraft including Dassault Falcon 900, Bombardier Global 6000 and Challenger 604, Embraer ERJ 145, Boeing VIP B787 and ACJ A340.

Private jet operators are turning to the latest technologies to be one step ahead in terms of comfort and innovation while at the same time differentiating themselves in what is becoming a busy market. “We are proud to collaborate today with 10 operators and aim to connect close to 50 operators by the end of 2023,” Morel said.
