

Riyadh Air selects FlightPath3D immersive inflight map experience

Riyadh Air selects FlightPath3D for inflight map

[Riyadh Air](#) is introducing a next-generation inflight map experience, created in collaboration with [FlightPath3D](#). Set to debut on the airline's upcoming 787-9 Dreamliner fleet, the immersive platform combines intuitive design, real-time flight data and visual storytelling to deliver a seamless digital companion that inspires exploration and elevates the passenger experience.

This collaboration reflects Riyadh Air's commitment to selecting world-class solutions that elevate every aspect of the inflight journey, the September 9 press release said.

The interface offers passengers effortless access to their full flight path, real-time speed and altitude updates and an interactive view of both the destination and Riyadh Air's network.

"Riyadh Air challenged us to reimagine what an inflight map could be," said Duncan Jackson, President of FlightPath3D. "This collaboration delivers a solution both innovative and beautiful. Guests will enjoy an experience that informs and inspires, aligning perfectly with Riyadh Air's forward-thinking approach."
