

# SPI launches RAVE OS

Safran Passenger Innovations' latest software platform, RAVE OS

[Safran Passenger Innovations](#) (SPI) announced the launch of Safran's latest software platform, RAVE OS, with [All Nippon Airways](#), [STARLUX](#), [Virgin Atlantic](#) and other airlines.

A [March 2 press release](#) said RAVE OS offers a modern user interface with features such as pinch to zoom, picture in picture, and multi-tasking capabilities.

"RAVE OS also features the ability to run third party applications, play 4K content and provides an immersive experience with full cabin Bluetooth audio," said the release. "Keeping with the essence of RAVE DNA — Reliable, Affordable and Very Easy — RAVE OS maintains its common core and a configurable and brandable UI, ease of maintenance and lowest Total Cost of Ownership."

RAVE OS is paired with SPI's ULTRA displays featuring RAVE's docking station with display sizes ranging from 13.3 inches to 43 inches and high-power USB-C in every seat.

"We are thrilled to deliver a product that encapsulates the key innovations we have been developing over the last three years, driven by customer and passenger needs. As we continue to grow and innovate, we will prioritize investment in products that make a difference to our customers," said Matt Smith, CEO of Safran Passenger Innovations.
