

SriLankan Airlines selects Inflight Dublin's Everhub for W-IFE

Inflight Dublin's Everhub solution for SriLankan Airlines

[Inflight Dublin](#) has been selected by [SriLankan Airlines](#) for an extended partnership with the deployment of its wireless streaming solution, Everhub. This development marks a significant milestone in the long-standing relationship between the two companies.

The solution will be deployed in its aircraft power configuration, across two existing A320 aircraft.

"We wanted our passengers to be able to enjoy a consistent and memorable experience when travelling with SriLankan Airlines, regardless of what aircraft they boarded, and Inflight Dublin's Everhub solution allowed us to achieve this," said Maria Sathasivam, Manager Product Development of SriLankan Airlines. "We are delighted to grow our partnership with Inflight Dublin further, and look

forward to evolving the onboard product offering together.”

Inflight Dublin’s Everhub platform, designed with user experience in mind, offers a secure and user-friendly solution that supports a fully branded, customizable interface tailored to SriLankan Airlines’ requirements. Everhub will allow the airline to cater to diverse passenger preferences, delivering an elevated in-flight experience that enhances engagement and satisfaction.

“We are thrilled to expand our partnership with SriLankan Airlines with the introduction of Everhub across its fleet,” said Philip McCarthy, Commercial Director at Inflight Dublin. “The Everhub solution is designed to give our clients the utmost flexibility for their respective requirements, regardless of fleet type or aircraft size, which enabled us to deliver the synergies desired by SriLankan Airlines. We are very excited to bring an enhanced experience to SriLankan Airlines’ passengers.”
