

Stellar Entertainment introduces Stellar Awards Hub

A preview of the Stellar Awards Hub online platform

[Stellar Entertainment](#) has unveiled the [Stellar Awards Hub](#), a tool for licensing IFE. The company has created the hub to make it easier for airlines to know which films and TV shows are available for inflight entertainment licensing.

The website, powered by the company's pixL™ content management platform, is now available for airlines to navigate a library of award-winning films and TV series. The site is continuously updated in real-time to showcase recent winners and nominees available for IFE licensing. When browsing titles, airlines can view key information such as availability dates, distributors and territory details.

“This pioneering tool is the first of its kind, and we plan to include more awards shows in the future,” Stellar Entertainment said in the announcement.

On the Stellar Awards Hub platform, the available content is searchable by category, based on the applicable award show. Collections include Oscars, Golden Globe Awards, Emmy Awards, British Academy Film Awards, Critics’ Choice Awards and Film Independent Spirit Awards.
