

ABC International receives EASA Production Organization approval

ABC receives EASA approval

[ABC International](#) announced this week that it has officially obtained EASA Production Organization Approval (POA) under Part 21 Subpart G, granted by ENAC (IT.21G.0094).

“From the very beginning, our goal has been to provide fully integrated cabin solutions by combining engineering expertise with certified manufacturing capabilities. The approval marks another important milestone in our journey, enabling us to provide integrated cabin solutions from design to production, while ensuring the highest standards of quality and regulatory compliance,” the company said via LinkedIn.

“This is an important milestone that will hopefully allow us to be more competitive and successful in our reference market. We have achieved this goal thanks to the contribution of the entire organization and all those who are committed to our reality on a daily basis,” said Rodolfo Baldascino, Chief Commercial Officer, ABC International.

Baldascino extended a heartfelt thanks to the institutional bodies, the [ENAC](#) (Ente Nazionale per l'Aviazione Civile) and the [EASA](#) (European Union Aviation Safety Agency) for supporting, guiding, examining and authorizing ABC International to operate as an approved organization.

Baldascino also extended thanks on behalf of ABC International and its Quality Manager, Vincenzo Ranucci, to Dr. Carlo Marfisi, Director of the Campania Territorial Directorate; Ing. Giuseppe Barsotti, Head of the DTC Office - Aeronautical Activities Office; to Ing. Marco Sandrucci, PM Surveillance of the Initial Airworthiness Sector; to Dr. Giuseppina BATTAGLI, Secretary of the Campania Territorial Directorate; Ing. Ruggiero Sepe, Team Leader Initial Investigation of DT Campania; and Ing. Mauro

Maddaluno Team Member of the same unit.

“This achievement reflects the commitment, professionalism and collaboration of the entire ABC International team,” the LinkedIn post concluded.
