

# ACJ signs business agreement with CTT Systems for TwoTwenty bizjet

ACJ has inked a business agreement with CTT Systems for the TwoTwenty bizjet

[CTT Systems AB](#) has signed a business agreement with [Airbus Corporate Jets](#) (ACJ) to supply the humidification system for the ACJ TwoTwenty business jet. ACJ is launching humidification as part of its cabin catalogue for the TwoTwenty to be delivered as bolt-on-kit system with STC together with new built TwoTwenty (green) aircraft.

The TwoTwenty humidification system is developed by CTT in partnership with ACJ. The joint ambition is to achieve a minimum weight solution while ensuring the highest levels of performance, including optimized humidity in the entire cabin with efficient anti-condensation protection. The humidification system is designed to equally distribute humidified air in the extra-large business jet cabin.

"The ACJ TwoTwenty includes a flexible cabin catalogue, opening the Xtra large business jet categories. Airbus is committed to offer market leading comfort and best cabin performance in the extra-large TwoTwenty business jet," said Benoit Defforge, President ACJ. "As part of this effort, we will promote the humidification system. Because only if humidity is restored to adequate and ground-like level, passengers can fully benefit from long-haul travel in the best large-cabin business jet on the market."

"We are delighted that Airbus Corporate Jets includes humidification as part of the comfort climate in ACJ TwoTwenty aircraft," said Peter Landquist, Vice President Senior Advisor Sales at CTT Systems. "ACJ is first-in the large-cabin business jet segment to offer significantly elevated cabin air humidity with total moisture protection that eliminates all fuselage condensation issues."
