
Semmco opens new U.S. facility

By **PAX International** on March, 12 2019 | Cabin Maintenance

[Semmco](#), a British engineering company that designs, manufactures and installs aviation maintenance solutions, announced the recent opening of its new Arlington, Texas manufacturing facility.

The company's new USA facility will provide local support and service to its North American clients, including [Air Canada](#), [Delta](#) and [American Airlines](#).

Stuart McOnie, Managing Director of Semmco, commented on the opening in a statement from the company: "Demand for aviation maintenance in the USA is increasing to prepare for the upsurge of airline passengers. Our USA facility will support the growth in demand for high quality, reliable and safe MRO equipment in the region. We welcome attendees at MRO Americas 2019 to meet us at our stand."

The Semmco team will meet with customers and prospects and introduce its new U.S. team, including Will McOnie, USA Sales & Business Development Manager; Chloe Denty, USA Operations Manager; Andrew Walling, USA Special Accounts Manager; and Stuart McOnie, Managing Director.

Key products in Semmco's MRO equipment range will also be on display at [MRO Americas](#) from April 9 to 11, in booth 3713. Products will include Semmco's Nitrogen Ground Support Equipment, Wheel and Access Step ranges.
