
Airbus, Magnetic MRO sign maintenance agreement

By **Sabrina Pirillo** on March, 11 2020 | Partnerships, Collaborations & Acquisitions

[Magnetic MRO](#) and [Airbus](#) have signed a long-term airframe maintenance agreement for the support and maintenance of the Airbus family aircraft.

Magnetic MRO provides narrow and wide-body aircraft line maintenance via its global network of more than 20 stations across Europe, Asia and Africa, as well as EASA and FAA-certified total technical care services for aircraft operators and owners in Europe, the Middle East, Africa and Asia. Integrated with LEAN processes, aircraft maintenance is conducted at Magnetic MRO's advanced five bay facilities which are equipped with high-tech solutions, including automated docking stations, tooling RFID and other IT solutions to allow efficiency in work and precise on-time delivery.

"Total technical care is not only about the quality of MRO services," said Inga Duglas, Chief Commercial Officer at Magnetic MRO. "It's also about first-class customer support, transparent processes, and exceptionally high procedural standards. We're very proud of our team which has proven to meet these standards on numerous occasions. We are glad to expand our partnership with Airbus and share the experience of Magnetic MRO high quality of service with them and their partners. This has definitely opened new horizons for Magnetic MRO, and we are looking forward to wide cooperation now that we are an approved supplier for Airbus maintenance-related activities."
