
Oxley and Leki sign distribution deal

By **Rachel Debling** on April, 26 2018 | Partnerships, Collaborations & Acquisitions

PAR64 PMA LED Landing Light

[Leki Aviation](#) has entered into an exclusive distributorship with [Oxley](#) that covers many products, including the PAR64 PMA LED Landing Light which, according to an April 26 release, "offers significantly reduced operating costs for commercial aircraft operators who use halogen-based sealed beam landing lights, and who need increased operational lifetime and improved dispatch rates."

The benefits of the Oxley solution is that it is a form-fit replacement, requires no aircraft modification and produces the optical power and beam pattern of the unit it replaces.

Its lightweight design, reduced power consumption, reduced maintenance cycles and shock and vibration resistance are additional benefits noted by the company.

For more information, visit the new [Leki Aviation web shop](#), or contact your local Leki Aviation sales office.
