
Collins Aerospace picks new President for interiors products

By **Rick Lundstrom** on April, 16 2020 | People

[Collins Aerospace Systems](#) has named Troy Brunk President, Interiors, reporting to Collins Aerospace president Stephen Timm. He succeeds Dave Nieuwsma, who was recently named President, Avionics, for Collins Aerospace.

In his new role, Brunk leads a broad portfolio of aircraft interior systems for seating, lighting, galley, oxygen, passenger service, evacuation, de-icing, lavatory, waste and potable water for commercial and military customers.

Brunk's 27 years with Collins Aerospace has included leadership roles of increasing responsibility. Most recently he served as vice president and general manager for the Communication, Navigation and Guidance Solutions portfolio for the company's Mission Systems business. He oversaw a broad portfolio of military applications and solutions, ranging from communication and navigation, to actuation and guidance, and health and fuel sensing systems.

Brunk also served as Vice President and General Manager for Airborne Solutions, where he oversaw the avionics and flight deck solutions for military fixed-wing aircraft and helicopters.
