

Geven to outfit Eurowings with Essenza seat

A total of 23 ship sets of the Essenza will be delivered to Eurowings

[Geven's](#) Essenza seat model has been selected for [Eurowings'](#) fleet retrofit program.

Essenza was Lufthansa Group's choice for line-fit seating across the various members of the group as part of a larger partnership, which began in 2017. The Essenza model for Eurowings features an exclusive design and dedicated Eurowings trim and finish. Essenza features generous in-arm and rear meal tables with an all-device accommodating dedicated holder, coat hook, as well as customized literature and amenity pockets as well as life vest pouch.

Essenza has bottom cushions, completed for the Eurowings fleet with a combination of light and dark grey, finished with a personalized accent of violet red on the backrest for the dress covers.

"We are delighted at the success of our cooperation with the LH Group and proud of the satisfaction with the product they have expressed, says Managing Director of Geven, Alberto Veneruso, in today's announcement.

Geven is delivering 23 ship sets to Eurowings at a pace of two per week between April and July of this year.
