

LATAM unveils E195-E2 cabin design

LATAM's E195-E2 aircraft will feature a total of 136 seats arranged in a 2-2 cabin configuration

[LATAM](#) has unveiled the cabin details of its E195-E2 fleet, which LATAM Airlines Brazil will begin operating during the fourth quarter of this year to strengthen connectivity across its domestic network in Brazil. With a firm order for 24 aircraft, this strategic addition is designed to provide passengers with a comfortable, connected and personalized travel experience. Featuring a modern cabin design and enhanced comfort attributes, the fleet reinforces LATAM's commitment to continuously elevating the passenger experience through innovation, technology and outstanding service, the press release said.

The E195-E2 aircraft will feature a total of 136 seats arranged in a 2-2 cabin configuration, with two seats on each side of the aisle. The aircraft will also offer Premium Economy and Economy cabins, with up to 20 seats available in Premium Economy, depending on the aircraft configuration.

Premium Economy, which will not include blocked middle seats, will provide passengers with an enhanced travel experience featuring additional legroom, greater seat recline and personalized onboard service. Throughout the aircraft, passengers will enjoy seats equipped with adjustable headrests, reclining backrests, personal device holders, and USB-C charging ports, all designed to provide greater comfort throughout the journey.

"While these are new aircraft, passengers can expect the same distinctive LATAM experience they know and trust. At LATAM, we are committed to continuously evolving the travel experience for our

customers. Every addition to our fleet strengthens our ability to offer a comfortable, connected, and personalized journey, reflecting what our passengers value most,” said Paulo Miranda, Vice President of Customers at LATAM Airlines Group.

The E195-E2 aircraft will also feature [SES](#)’s latest satellite connectivity technology, providing a more stable, consistent, and lower-latency internet experience throughout the flight. LATAM Pass members will enjoy complimentary onboard Wi-Fi, allowing them to stay connected during their journey. The onboard internet service complements the aircraft’s entertainment platform, LATAM Play, through which passengers can enjoy more than 2,000 hours of content, including 300 movies, more than 1,000 series episodes, and more than 900 music albums, as well as children's and reading content, including productions from platforms such as Disney+, HBO Max, and Paramount+. This entertainment offering complements the onboard beverage and snack service available throughout the flight.

With the addition of this new fleet, LATAM continues to strengthen its value proposition for passengers by expanding the connectivity of its network and introducing solutions that combine comfort, connectivity, and technology to deliver an increasingly modern and consistent travel experience across its network.
