[RECARO Aircraft Seating](#) has been selected by [Condor](#) to equip the Economy Class cabins of its Airbus fleet with BL3710 and lightweight SL 3710 seats. The order includes 28 A321 and 13 A320 aircraft to be delivered between 2024 and 2028, the February 29 press release said.

Close to 9,000 seats will be delivered and installed in a hybrid layout, featuring distinctive Condor branding elements.

The BL3710 seat is equipped with comfort amenities such as individual USB power, an enhanced ergonomic seat bottom, an adaptable tray table, elongated armrests and a bring-your-own-device (BYOD) holder for passenger entertainment on PEDs.

The lightweight SL3710 model offers advanced ergonomics suitable for all body types. There is USB power access at each seat and an integrated cup holder fitted on an eight-kilogram frame.

"This collaboration with Condor underscores our commitment to providing passengers with comfort and functionality, and also reaffirms our role in pushing the boundaries of sustainable design," said Dr. Mark Hiller, CEO of RECARO Aircraft Seating and RECARO Holding. "As Condor expands their Airbus fleet, we look forward to enhancing the in-flight experience."

The lightweight seats are an economic choice for the airline, offering fuel savings and reinforcing a commitment to sustainability.

“By choosing RECARO seats, we are striving to maximize comfort for our guests on short and medium-haul flights,” said Christian Schmitt, Chief Operations Officer and Accountable Manager, Condor. “With the new long-term partnership, we rely on the many years of experience, the latest innovations and a great service in this area at RECARO to strengthen the Condor product and onboard experience.”
