

Safran Seats recognised by the Institut Français du Design for Euphony

Euphony delivers a premium acoustic experience to premium passengers

The [Institut Français du Design](#) has awarded [Safran Seats](#) the Janus Label of Excellence for its the headset-free sound solution for aircraft seats Euphony.

Developed in partnership with [Devialet](#), an acoustic engineering company and unveiled in 2022, Euphony gives Business and First Class passengers a high-end individual audio experience without headphones, thanks to speakers located on both sides of the headrest of each seat.

“This award highlights the excellence of the engineering teams at Safran Seats and is a strong reflection of our capacity for innovation on behalf of our customers and the passenger experience.” said Victoria Foy, Safran Seats CEO in a January 26 press release.
