

Thompson Aero Seating announces A321neo program for THAI

The senior Thai Airways team at AIX 2025

[Thompson Aero Seating](#) has announced a program with Thai Airways International Public Company Limited ([THAI](#)), to deliver Business Class seats for its new A321neo fleet.

The Vantage seat offers fully flat business comfort, capable of delivering a premium passenger experience consistent with wide-body aircraft across THAI's network. The Vantage is a flagship in Thompson's range, setting a new benchmark for luxury and innovation throughout the industry. The latest generation Vantage, specifically optimized for the A321neo cabin, will be fully customized for THAI to enhance passenger comfort and personal space.

Thompson will deliver 16 luxury lie-flat Business Class seats in a 2-1-2 configuration, with Thompson's now iconic 'Throne' seat on alternate rows. A total of 32 shipsets will be delivered to support THAI's strategic network expansion and customer-focused vision, with the first scheduled for delivery later this year.

Keith Anderson, Chief Executive Officer, Thompson Aero Seating, said: "It is a pleasure to be supplying our fabulous Vantage seats to THAI. We look forward to working closely as a team and are thrilled that the latest iteration of our flagship seat will be taking flight with them."

Thompson's Vantage seat and rest of the Vantage seating family is on display at AIX 2025 on stand
