

# TSI Seats to feature in Airbus BFE catalog

By Rick Lundstrom on November, 22 2019 | Seating

Turkish Airlines is a key TSI customer, and has placed an order for 160 shipsets

With an agreement signed on November 20, [TSI Seats](#), will be featured in Airbus' Buyer Furnished Equipment (BFE) catalog starting in the first quarter of 2020.

The catalog offers seating choices to Airbus customers and will add to the success story of TSI Seats by putting the company in the spotlight for airlines all around the world.

TSI has been working with the airframer since 2015. TSI Seats Economy Class Skysofa and Epianka products will be featured in the potential future products section of Airbus BFE catalog for the A350 XWB, A330 and A320 aircraft families. Additional seats like the Eleso S model and Royalux, TSI's first Business Class product, will also be added into potential future products section of the catalog after certification phase is completed.

"We are pleased that we will be placed in Airbus BFE Catalogue. This latest accomplishment shows how hard we have worked to grow TSI Seats by investing in our employees, supporting infrastructure and innovation," TSI Seats General Manager Suat Sağıroğlu said, at an event marking the listing. "Being featured in the Airbus catalog will enlarge our reach and accessibility to world's leading

airlines and ensure our growth in the market”

Established in 2011 to design, manufacture, modify and merchandise aircraft seats and its spare parts TSI Seats continues its operations, for multiple aircraft types, in production facilities based in Istanbul, Turkey, and Utah, United States, with full design, engineering, manufacturing and R&D capabilities. TSI Seats have already delivered more than 120 shipsets and will be delivering more than 160 shipsets to its biggest customer Turkish Airlines.
