

Air Astana has new line of children's amenities

[Kaelis](#) and [Air Astana](#), the flag carrier of Kazakhstan, have partnered once again to launch its new collection of children's amenity kits.

This new collection comes with a range products to entertain children with board games, activity books, coloring pencils, key chains and other items that accompany the concept of each of these kits.

Each kit comes in a colorful bag based on six different professions or pastimes such as actors, magicians, scientists and skaters. For now, Air Astana is offering four of these sets. They are divided into two groups:

- Junior for kids aged between 3-6: Best Actor and Magnificent Magician; and
- Senior for kids aged between 7-11: Superb Scientist and Smart Skater.
