

AK-Service creates Economy kits for Air Astana

AK-Services Economy Class Kit for Air Astana

[AK-Service](#) announced today that it has launched new amenity kits for Air Astana's Economy Class Passengers. The "ECO concept" kits focus on adding more eco-friendly initiatives to the airline's onboard offerings.

The kits are available in two designs, one for inbound service and one for outbound. The kits include neck pillow, non-woven shopping bag, shoe horn, hair comb and other essentials for a comfortable journey. The internal components such as a toothbrush, shoe horn, hair comb, and ballpoint pen are made of biodegradable wheat straw-based material. AK-Service has also designed a cardboard phone holder that passengers can use to support their personal devices while enjoying entertainment with Air Astana's onboard multimedia system during flight.

AK-Service produces kits in its factory on home turf in St. Petersburg, Russia, making quality control a guarantee.
