

Condor takes Travel Organiser from skysupply

Passengers on [Condor](#) long-haul flights will receive the Travel Organiser as a gift.

Designed by [skysupply](#), the Business Class the kit has four foldable storage bags in white or yellow, made of sustainable materials. The four bags, presented in tropical design, are made of recyclable polyester and due to their functionality, they optimize the suitcase's room. They provide a storage space for cable accessories, shoes, T-shirts, and pants.

Business Class passengers can choose between two new amenity kits: the refresh and the sleep kit. The refresh kit contains a toothbrush made of bamboo, a lip balm, and a hygienic tissue. The sleep kit contains a sleeping mask made of bamboo, a pair of socks made of recyclable polyester, and earplugs.

Both kits are packed in 100 percent recyclable cardboard and are available - according to individual needs - on request to avoid unnecessary waste.

The Travel Organiser was a winner in this year's [PAX International Readership Awards](#).
