

EVA Air and Kipling introduce grey Premium Economy amenity kit

The grey Kipling amenity kit

[EVA Air](#) and [Kipling](#) have partnered to deliver a collection three of the collectible Kipling amenity kit series from [Clip Limited](#). Kipling is handbags, backpacks, totes, luggage and accessories brand. The kit, in a grey colour, is the third to be released, following a red amenity kit and a blue version. Each collection in this collectible series comes in a different colour and displays a unique landmark. The latest kit, launched in mid-November, features the brand's crinkled fabric and monkey mascot while introducing a new look, displaying the National Taichung Theatre in Taiwan. The kits are curated to look and feel valuable and fun while reflecting the image of the airline and brand, the press release said.

The kit is functional, with a reusable and stylish pouch. The items inside the amenity kit include eyeshades, socks, a dental set, a comb, earplugs and Hudson Made lip saver and face cream. The Hudson Made skincare products are designed to elevate the passenger experience by refreshing their travels.

The Kipling kit for EVA Air has some unique features in that it's the first time the brand has collaborated with an airline. The sought-after brand name offers a design that seamlessly integrates the imagery of the iconic monkey and a famous Taiwanese cityscape into one luxurious amenity kit.
