

Kaelis COPPTECH technology brings limitless options to airline industry

This is a special feature from *PAX International's* April 2021 [Amenities & Comfort digital edition](#).

Kaelis Protected by COPPTECH technology headrests

[Kaelis](#) tells *PAX International* in April that its Kaelis Protected by [COPPTECH](#) technology has hit the market with a boom. The company is in talks with various airlines who are studying the range of possibilities of incorporating the versatile antimicrobial application in cabin offerings. Kaelis is in the process of quotes prices for several airlines and rail companies.

First [introduced in October 2020](#), Kaelis Protected by COPPTECH technology can be applied to a range

of onboard products, from textiles and plastic to coating parts of the aircraft.

“The range is actually limitless,” explains Fernanda Veiga Chief Marketing Officer and Board Member at Kaelis. “Pajamas, blankets, pillows, socks, pouches, trays, jugs, ice buckets, crew masks, galley equipment are just some examples of what Kaelis Protected by COPPTECH can offer.”

Some customers are looking at bedlinens, table linens and headrests.
