

Kaelis partners with Azores Airlines for Business Class amenity kit

The collectible amenity kit from Kaelis and Azores Airlines

Passengers flying in [Azores Airlines'](#) Business Class will now receive a sustainable amenity kit. Designed by [Kaelis](#), the pouch collection was designed for travel convenience while putting environmental sustainability at the forefront. The pouch is made from canvas and natural materials, to minimize the impact on the environment. It's a durable, reusable pouch, intended for longevity.

The amenity kit has a geometric feel inspired by the airline icon logo. The pouch itself features the interior colours of the aircraft through various shades of grey. Each pouch has a colour of its own to match its identity with the different aircraft named Breathe, Wonder, Dream, Magical and Inspire, making the amenity kits collectibles.

Inside the kit, passengers will find hand-picked items designed to increase their comfort inflight. Comfortable socks for lounging are included and they are made from recycled materials, highlighting Kaelis' emphasis on upcycling and sustainability. Soft eyeshades for getting some rest on the journey are also part of this stylish amenity kit.
