

Diethelm Keller Aviation highlights meal carts lineup ahead of WTCE

DKA's new lineup of meal carts

[Diethelm Keller Aviation Pte Ltd](#) (DKA) is highlighting its Meal Carts lineup ahead of the [World Travel Catering & Onboard Services Expo](#) (WTCE). The two models are the Eco-Lite+ and XT2.5+.

The Eco-Lite+ is the company's lightest design, weighing 24 percent less than conventional carts. The full-size cart weighs 16.2 kilograms when empty, while the half-size cart weighs 10.4 kilograms when empty.

The XT2.5+ cart is designed for durability, with DKA calling it its "toughest meal cart yet." The cart features UNI-STRUCTURE technology, providing enhanced strength and quality without compromising the lightweight design. The full-size weight when empty is 16.5 kilograms while the half-size weight when empty is 10.7 kilograms.

DKA will be showcasing these models at WTCE, at booth 1F101 and invites attendees to come meet the new DKA.

These new additions to the lineup featuring enhancements come following DKA's acquisition by the LHM Group last year.
