

# Louis Philippe Mallette becomes President of AJW Technique

Louis Philippe Mallette, President, AJW Technique

[AJW Group](#) has announced the promotion of Louis Philippe Mallette to President of AJW Technique. AJW Technique's Maintenance Repair and Overhaul (MRO) facility is located in Montreal, Canada. Mallette brings more than 25 years of international operational and strategic expertise in the aviation industry to the role.

His previous roles include MRO Workgroup President of Aéro Montréal supporting Quebec's aerospace cluster, in their mission to increase cohesion, optimize competitiveness and drive sustainable growth in the region.

Before joining AJW Technique, Mallette spent 23 years at Bombardier, where he was promoted to General Manager. Since joining AJW Technique as Senior Vice President in September 2021, Mallette has guided the facility through its post-pandemic resurgence, showcasing his leadership prowess and commitment to excellence.

As President of AJW Technique, Mallette assumes responsibility for all facets of the facility's operations to optimize operational efficiencies with an ongoing mandate to propel strategic growth initiatives and nurture a culture of innovation and excellence, the May 9 press release said.

Mallette will continue to report to Clyde Buntrock, CEO of AJW Aviation and AJW Technique.

"We are delighted to announce Louis's promotion to President of AJW Technique. His extensive experience and leadership qualities make him the perfect fit to lead our world-class MRO facility to even greater heights," Buntrock said

“I am honoured and excited to take on this new role at AJW Technique. I look forward to working closely with the team to drive innovation, operational excellence, and growth in the aviation industry,” Mallette commented on his promotion.
