

# Pexco Aerospace appoints Anthony Ciringione as Vice President of Sales and Marketing

Anthony Ciringione, Pexco Aerospace's new Vice President of Sales and Marketing

[Pexco Aerospace](#) announced the appointment of Anthony Ciringione as Vice President of Sales and Marketing. The role will shape Pexco's market positioning and future product lines, according to the November third release.

"Anthony joins Pexco at an exciting time in the company's history as it celebrates its 50th anniversary in 2023 and the recent launch of its latest blue-sky cabin interior technology, [AirShield](#), a finalist in

the Crystal Cabin Awards 2022,” the release said.

The release noted that Ciringione’s new role will “see him spearhead Pexco’s growth, leading its strategic market positioning and developing future commercial aerospace product lines, focusing on building direct relationships with the world’s biggest airlines” and that Ciringione “will harness his extensive engineering and sales experience to explore new business opportunities in raw materials, lightweight composites, and next-generation innovation while mentoring Pexco’s expanding team of sales and customer service representatives and business unit managers across the US and Europe.”

“I look forward to using my knowledge and experience to navigate the road ahead and make sure our 50<sup>th</sup> anniversary is one to remember,” Ciringione said.

Jon Page, President at Pexco Aerospace, added: “Anthony’s experience speaks volumes about his strategic knowledge of the manufacturing industry and his ability to market highly engineered products. His expertise in both engineering and sales adds huge value to our customers and will empower him and his team to drive our business to even greater heights.”

Ciringione attained a master’s degree in mechanical engineering from the University of Rhode Island and a Graduate Certificate in plastics extrusion from the University of Massachusetts Lowell. He has spent more than a decade in the aviation, additive manufacturing, and medical device industries. His most recent post was with Concordia Fibers LLC.
