

Air Nostrum and Kaelis introduce custom ice bucket

Air Nostrum and Kaelis introduce custom slim ice bucket

[Air Nostrum](#) has introduced a customized slim ice bucket that aims to enhance the onboard experience for passengers and flight attendants. The dark blue ice bucket also displays the airline's logo.

Its rectangular shape is designed to fit on trolleys, maximizing space efficiency and allowing easy access and storage. Its lid is attached to the body of the bucket and has a magnetic closure. When the lid is open, it generates additional space on top of the trolley because it can be used to hold glasses, lemons, napkins or mixers.

The ice bucket can hold up to three kilograms of ice. It features double-wall insulation, keeping the ice cool for up to eight hours throughout a flight, guaranteeing passengers' drinks are always served

chilled, the July 30 press release said.
