

Global Inflight Products introduces compostable tableware range

Global Inflight Products' compostable tableware range

Global Inflight Products ([GIP](#)) is introducing its compostable tableware range for hot and cold meals. Designed to revolutionize inflight dining, the tableware products are plastic- and aluminum-free, fulfilling the supplier's mission to help banish plastic and aluminum from inflight food service.

"Cost-effective, cabin crew-friendly and planet positive, our space efficient eco-conscious marvel is set to transform services," reads the GIP press release. "Let's responsibly reshape the skies together."

GIP will be present at IFSA Global EXPO at booth 753. The event runs September 19 to 21 in Long

Beach, California.
