

# WTCE spotlight: MY DRAP's recyclable napkins

MY DRAP napkins are 100 percent biodegradable and recyclable

[MY DRAP](#), a unique textile concept born from an innovative family company founded in 1917, is heading to WTCE Hamburg this year June 6 to 8. The patented in-house developed Seamless TEX technology enabled the MY DRAP team to create a unique textile concept.

Each napkin designed by the company is made with 100 percent cotton and finished with a simple cut and dotted line design. These choices represent the MYDRAP original brand.

Blending the luxurious sophistication of pure natural cotton with the convenience of the single-use

concept, MYDRAP table linen helps to address the functional demands and aesthetic priorities of inflight service.

Today, MYDRAP napkins are offered to most luxurious hotel and airline guests worldwide. The patented product is designed and manufactured in Barcelona.
