

# Plane Talking Products collaborates with Caledonian Sleeper on custom tartan products

Tartan-themed room service delivery items by Plane Talking Products for Caledonian Sleeper

[Plane Talking Products](#) has developed a range of dining products in collaboration with the [Caledonian Sleeper](#) guest experience team and crew. The products for the train's Club Car are set to elevate the onboard room service delivery.

"A key focus was to add customization and encompass locality using the Caledonian Sleeper official tartan," PTP said in its LinkedIn post. "Everything is produced in a more sustainable way to reduce environmental impact - including selecting materials which are either widely recyclable, compostable, or biodegradable for safe and conscious disposal."

The range of products is primarily made from sustainability-sourced paper and features plastic-free cutlery packs and compostable cups for hot beverages.
