

Aeroméxico upgrades inflight earphones for improved comfort and sound

Aeroméxico's inflight earphones feature a more comfortable silicone-padded design, improved audio performance and paper packaging as part of the airline's sustainability initiatives

[Aeroméxico](#) has introduced new inflight earphones, in collaboration with [Kaelis](#), as part of its ongoing efforts to enhance the onboard passenger experience, combining improved comfort with updated packaging that supports the airline's sustainability goals.

The refreshed blue earphones feature soft silicone pads designed to provide a comfortable fit for passengers on both short- and long-haul flights. According to the June 29 Kaelis press release, the earphones are equipped with ferrite magnet speakers and 32 Ohm impedance, delivering balanced audio performance with a wide frequency response range and sensitivity. Passengers can expect clear sound quality while watching movies, listening to music or accessing other inflight entertainment content.

As part of Aeroméxico's sustainability initiatives, the earphones are now packaged in a paper bag, replacing previous packaging with a more environmentally conscious alternative.
