

Airport Dimensions debuts in Qatar

Airport Dimensions, which recently acquired sleep n' fly, has launched premium sleep pods at Hamad International Airport in Qatar

[Airport Dimensions](#), provider of premium shared-use lounges, has recently acquired [sleep 'n fly](#), and has announced it is now ready to launch "its first non-traditional lounge" at Qatar's [Hamad International Airport](#) (HIA) in Doha, according to today's release. This will also mark the launch of Airport Dimensions' first premium lounge offering in the Middle East.

The concept combines Airport Dimensions' expertise in global lounge operations and design, with sleep 'n fly's unique offer to provide a comfortable, private sleeping and social distancing area for passengers.

HIA is classified as a five-star airport by [SKYTRAX](#) and currently holds the titles 'Third Best Airport in the World', 'Best Airport in the Middle East' and 'Best Staff Service in the Middle East' at the [SKYTRAX World Airport Awards 2020](#). Located at the heart of HIA's transit area and only a stone's throw away from the airport's iconic art piece, Lamp Bear, the 225 square meter lounge features a selection of sleep pods and cabins with accommodation for up to 50 guests. Visitors can pay by the hour to stay at one of the sleep units, which provide a soundproofed and air-conditioned space to relax and rest ahead of or between flights.

Launched at Hamad International Airport, the sleep n' fly 225 square meter lounge is located at the heart of HIA's transit area and only a stone's throw away from the airport's iconic art piece, Lamp Bear

What's available

- 24 FlexiSuite Pods: Launched at Hamad International Airport, this 180° flat-bed reclining seat in a soundproof space represents a world first in sleeping pod design. It features dimmable ambient lighting, a reading light, air conditioning, a 32-inch screen to connect to the travelers' mobile, tablet or laptop, a folding tray table, cup holders, a small waste bin, baggage storage and compartments to store coats, shoes and laptop.
- 13 Sleep Cabins: Four double bed cabins with an optional pull-out bed for a child of up to 115 cm in height (maximum 2 adults and 1 child), and nine bunk bed cabins are available. These small but stylishly designed spaces are soundproof and have air conditioning, as well as main, ambient and reading lights, an alarm clock, a coat hanger, a mirror and tray table.

The sleep pods and cabins offer a place for travelers to relax and rest between or ahead of flights

Errol McGlothan, Managing Director at Airport Dimensions, said, "With its state-of-the-art facilities and five-star service, Hamad International is the perfect place to launch our new sleep and private space concept and, indeed, our first lounge concept in the Middle East. The sleep pods and cabins provide a convenient, premium and safe space for travelers looking to recharge during a long layover or enjoy a quick nap before an early morning flight. We're looking forward to working with the airport to further enhance the travel experience for passengers."

Twenty-four FlexiSuite pods are available. They feature 180° flat-bed reclining seat in a soundproof space with dimmable ambient lighting, a reading light, air conditioning, a 32-inch screen to connect to the travelers' mobile, tablet or laptop, a folding tray table, cup holders, a small waste bin, baggage storage and compartments to store coats, shoes and laptop

The sleep 'n fly lounge at Hamad International Airport is open to walk-in and corporate guests, online prebookings, Priority Pass members and LoungeKey users. Complimentary branded merchandise including pillows and blankets will be available to visitors during their stay.

"Sleep 'n fly is taking all necessary steps to ensure their guests feel safe and well whilst relaxing in their own personal space ahead of their flight," reads the release. "All sleep 'n fly sleep lounges, sleep pods and cabins are thoroughly disinfected after every guest check-out, and any public touch points such as reception counters and payment terminals are disinfected after each use. All staff have been receiving regular health and safety training and COVID-19 testing."

Full details on the safety precautions sleep 'n fly is taking can be found [online](#).
